I am a numbers nerd, but that was never a surprise, coming from a family with numbers in their blood. I knew I could never be anything other than a bookkeeper.

Before I started Bookit, I worked for a lot of businesses, keeping their books and making a difference. But when you're a little cog in a big wheel, that difference isn't noticed; moreover, it isn't celebrated. And it should be.

Now I live for the success that my clients deserve. What bookkeeper can say that their work saved a client's marriage? I have another client that hit their ten-year goal of reaching \$1 million in turnover, going from home-cooked goods to a retail store. Bookkeeping isn't about crunching numbers and

producing reports – it's about your business and your life, and with us, we will always do what it takes for you to feel relaxed and at ease because we've got your back. No matter what your goal is, we are here to make it happen. We feel your success.

A BIT ABOUT ME

My husband John and I have two cheeky children, Jessica and Lachlan – they are our life and keep things interesting!

THINGS I LIKE

Gym, tennis, motor racing, cricket, AFL, pretty much all sports, whether watching or playing.

WHEN I'M NOT AT WORK

I love nothing more than a day at the beach. Watching AFL and Cricket are my favourite past times. I like to participate in lots of charity fun runs and events – every little bit makes a difference.
