Being a bookkeeper means I get to help businesses achieve their goals.

Bookkeeping may seem like a job that has little impact on business, but numbers are everything when it comes to seeing how well a business is doing, and those numbers have to be right. That's why I love getting accounts to reconcile. The feeling I get seeing the numbers balance is always the best. It means that my clients can spend their time stress-free because their books are sorted. They thank us a lot because of what we do for them, and we love how happy they are.

I love Bookit because we have an amazing team. Each of us

brings something different to the table, and we're all ready to be flexible and support each other as needed. It feels good to know that you're part of a like-minded team who genuinely care about our clients and their achievement. Knowing that I am helping Bookit grow because of the service we give our clients brings me immense joy.

## A BIT ABOUT ME

I have an amazing family.  
My husband has a demanding executive management job but is always there for us no matter what. My two daughters are brilliant in every way. We have a Siberian Husky named Vishna.

## THINGS I LIKE

The beach. There's nothing better than warm sand shifting beneath your feet and the sound of the waves rolling and sliding around.

## WHEN I'M NOT AT WORK

I'll be out at the beach with my family, enjoying time on the water.
