"I love bringing order to chaos!"

Bookkeeping is about bringing order to chaos, and that's what I love about it.

It's about being accurate and thorough, leaving no stone unturned. Numbers never lie, so there is always a right answer, and it's always backed up with these numbers. Most of all, I love taking that stress away from our clients who don't like dealing with the books.

Before Bookit, I worked for a few different businesses, so I know firsthand that each business requires a tailored method of bookkeeping, and at Bookit, I use that experience to give each of my clients the best service that's specific to them.

The nicest thing that's happened to me so far at Bookit was when a client's accountant was so pleased with how I'd done the books, which meant they could complete the tax side straight away and with absolute ease.

Working with Bookit means I get to be in a great team environment that appreciates my work and lets me do what I do best.

A BIT ABOUT ME

I have two daughters and a schnauzer named Boris, who likes to sleep on the bed but isn't allowed (though sometimes we let him get away with it).

THINGS I LIKE

I love visiting the USA when I can, but otherwise, you'll find me playing video games.

WHEN I'M NOT AT WORK

You'll find me with my daughters, or playing video games. It's all about the video games.
